

Dear Parents,

10<sup>th</sup> November, 2014

In 2014 all students studying General Mathematics in Years 11 and 12 used HotMaths and Mathletics, both of which are web-based learning programs that integrate home and school learning via the internet.

At a small cost students had at their fingertips both revision and practice for every topic studied. Teachers were able to assign specific activities for students to complete in class or at home, but most importantly students were able to review and revise learned concepts themselves by regularly logging into HotMaths and Mathletics and finding topics they needed to practise.

After spending a full year comparing the two programs we have decided that HotMaths best supports the General Mathematics students in their learning.

The benefits of HotMaths are:

- Detailed lesson notes
- Walkthrough-guided examples
- Scorcher- drills and practice
- Graded Questions
- Topic tests

In 2015 **ALL** students studying General Mathematics in either Year 11 or Year 12 will need to pay a small subscription of \$10 to gain access both at school and at home. **HotMaths is a compulsory component of studying General Mathematics** and all students will have their participation and completion of work recorded and reported upon.

**COST:** The **cost for 2015** will be **\$10** which can be paid at Office C.

**PAYMENT:** Payment can be made at any time from now on, and must be finalised by end of Week 2 in Term 1 2015.

**Please**

- forward your payment of \$10 to the office between now and the end of Week 2, Term 1 2015 (Friday 6th February), and
- Complete the form below and return to your Maths teacher as soon as you have paid

*Ms Gibson*

(Head Teacher Maths CGHS)
